

## **Dario BARBERIS**

[Dario.Barberis@cern.ch](mailto:Dario.Barberis@cern.ch)

Dr. Dario Barberis graduated in Physics at the University of Milan (Italy) in 1980. PhD (Physics) at the University of Manchester (UK) in 1982. The research activity concentrated initially on the experimental study of heavy quark production and decay in fixed-target experiments with photon and hadron beams. The main areas of work were event reconstruction (pattern recognition in the magnetic spectrometer and vertexing) and analysis. Since 1996 member of the ATLAS Collaboration, working on the simulation, reconstruction and analysis of events at LHC, in order to prepare the Technical Design Reports of the ATLAS experiment. In 1999-2003 Software Coordinator of the ATLAS Inner Detector (the tracking system) and member of the Computing Steering Group. Since February 2003 Computing Coordinator of the ATLAS Collaboration.
