

Vincent BRETON
breton@clermont.in2p3.fr

Vincent Breton received his Engineer degree from Ecole Centrale de Paris in 1985 and his PhD in Nuclear Physics from the University of Paris XI- Orsay in 1990. From 1990, he has been a research associate at the French National Center for Scientific Research (CNRS). After participating for 10 years to high energy and nuclear physics experiments at University of Stanford, Thomas Jefferson Laboratory (USA) and CERN (Switzerland), his focus shifted towards the application of grid technology to biomedical sciences. Leader of the biomedical work package of the european DataGrid project, he has chaired the first european conference on grids for health in Lyon in January 2003.
