

## **Grid Activities in Canada**

Reda Tafirout

[tafirout@triumf.ca](mailto:tafirout@triumf.ca)

TRIUMF Research Scientist

In this talk I will give an overview of Grid activities in Canada, mostly within the context of LCG, and on how LCG did benefit from unique Canadian Grid initiatives in order to maximize the usage of Grid resources. TRIUMF, Canada's National Research Laboratory for Particle and Nuclear Physics (located in Vancouver), is establishing a Tier-1 computing centre for the ATLAS experiment. I will talk about our current status, plans and participation in ongoing LCG Service Challenges. I will also mention ongoing activities happening in our Canadian universities which will be federated into Tier-2 centres.
